

SOUTH WALES REGIONAL AGGREGATES WORKING PARTY

ANNUAL REPORT FOR 2022
Published 3rd September 2024

The statistics and statements contained in this report are based on information from a large number of sources and are compiled to an appropriate level of accuracy and verification.

Readers should use corroborative data before making major decisions based on this information.

The SWRAWP wishes to acknowledge the financial support of the Welsh Government which has enabled this report to be coordinated and published. The SWRAWP also wishes to record its thanks to all those in the mineral industry and the Mineral Planning Authorities in South Wales who have contributed to the production of this report.

Technical Secretary:
Thomas R Boothroyd
Senior Minerals & Waste Planning Officer
Carmarthenshire County Council

1. INTRODUCTION

1.1 This report has been prepared by the South Wales Regional Aggregate Working Party (SWRAWP) and **covers the calendar year 2022**. Each year, the SWRAWP co-ordinates the aggregate sales information received from all mineral operators via the eighteen local planning authorities which make up the South Wales region. Where annual survey returns have not been made, estimated data has been used. In 2022 less returns have been made and more estimates have had to be used, reducing the degree of confidence in the figures. The work of the SWRAWP has been funded by Welsh Government (WG) since April 2002. The current grant funding runs until March 2025.

1.2 The collated information in this report makes a significant contribution to the ongoing study of supply and demand patterns and provides a vital input into the monitoring and review of Welsh Government's policy for aggregates enshrined in Planning Policy Wales and amplified in Minerals Technical Advice Note 1: Aggregates (MTAN1). It also assists in the monitoring of progress towards the achievement of the recommendations set out in the *Regional Technical Statement – Second Review (RTS2) – September 2020*. This information is also necessary to Local Planning Authorities in carrying out their statutory functions in respect of the preparation of local development plans and the determination of planning applications. The information is also made available to the general public and industry, the latter using it to assist in planning new investment.

1.3 The Mineral Products Association Wales (MPAWW) has issued advice to its members in relation to the confidentiality of data on aggregates supply which is supplied to Local Planning Authorities in response to the annual aggregate working party survey. All data is provided on a 'Commercial in Confidence' basis and can be used by Local Planning Authorities for purposes associated with their planning functions so long as it prevents data being ascribed to individual planning units, unless specific permission to use the data is given by the operator. The British Aggregates Association has always encouraged members to fully disclose relevant information.

2. SOUTH WALES REGIONAL AGGREGATES WORKING PARTY

2.1 The SWRAWP is one of eleven Aggregates Working Parties (AWPs) in England and Wales which provide information and advice to the Department for Levelling Up, Housing and Communities (DLUHC) and to the Welsh Government in relation to the supply of, and the demand for, aggregate minerals.

2.2 The SWRAWP is a technical working group with membership drawn from officers of the 18 Local Planning Authorities, representatives of the Mineral Products Association Wales (MPAW), the British Aggregates Association (BAA), representatives of the construction and demolition industry, Welsh Government, The Crown Estate and Natural Resources Wales. It is not a policy making body. A list of members at the date of publication of this report is provided in Appendix A.

2.3 One ordinary meeting of the SWRAWP was held in March 2022.

2.4 Meetings were held with Welsh Government officials to discuss RAWP contract work. Regular contact has been maintained with Local Planning Authority Officers to ensure robust and consistent data is used for the annual survey.

FIGURE 1 – Primary Aggregate Sales 2013-2022 (million tonnes)

3.1 Table 1 shows the total primary aggregate sales from the region over the 10-year period 2013-2022, subdivided between South West Wales, South East Wales and Powys/BBNPA. These sub-regions correspond to the areas for which data has been available over the last 10 years allowing data to be compared and at the same time respecting confidentiality.

3.2 South West Wales is made up of the following Mineral Planning Authorities – Carmarthenshire, Ceredigion, Pembrokeshire, Pembrokeshire Coast National Park, Neath Port Talbot and Swansea.

3.3 South East Wales is made up of Blaenau Gwent, Merthyr Tydfil, Monmouthshire, Newport, Torfaen, Bridgend, Caerphilly, Cardiff, Rhondda Cynon Taf and the Vale of Glamorgan.

3.4 The total sales of primary aggregate decreased by 9.8% in 2022 to 8.49 million tonnes compared to 9.41 million tonnes in 2021.

3.5 Crushed rock sales decreased to 7.65 million tonnes in 2022 compared to 8.52 million tonnes in 2021, with decreases in sales across all three areas compared to 2021.

3.6 Marine sand and gravel sales decreased to 620,000 tonnes in 2022 compared to 640,000 tonnes in 2021, with decreases in South West Wales and South East Wales.

3.7 Land-won sand and gravel sales in 2022 decreased to 220,000 tonnes from 250,000 tonnes in 2021. Land won sand and gravel sales come exclusively from sites in South West Wales.

3.8 Crushed rock accounts for 90.11% of primary aggregate sales with marine landings contributing 7.3% and land won sand and gravel approximately 2.59%.

3.9 South East Wales has the highest crushed rock sales at 3.38 million tonnes (44%), with Powys (including Brecon Beacons) at 2.68 million tonnes (35%) and South West Wales 1.59 million tonnes (21%). Marine sand and gravel sales are highest in South East Wales at 430,000 tonnes (69%) with South West Wales accounting for 190,000 tonnes (31%).

4. CRUSHED ROCK

Table 2
Crushed Rock Sales by Rock type and End Use in 2022 (million tonnes)

	Coated Roadstone	Uncoated Roadstone	Concrete Aggregate	Fill/Other Construction Uses	Rail Ballast	TOTAL AGGREGATE
Limestone	0.21	0.38	0.81	2.79	0	4.19
Sandstone	1.23	0.16	0.03	0.71	0	2.13
Igneous	0.40	0.06	0.07	0.80	0	1.33
TOTAL	1.84	0.60	0.91	4.30	0	7.65

NB - Figures contain estimates where no survey return was provided

Table 3
Crushed Rock Sales by Rock type and End Use in 2021 (million tonnes)

	Coated Roadstone	Uncoated Roadstone	Concrete Aggregate	Fill/Other Construction Uses	Rail Ballast	TOTAL AGGREGATE
Limestone	0.20	0.52	0.90	2.74	0	4.36
Sandstone	1.41	0.28	0.07	0.89	0	2.65
Igneous	0.36	0.06	0.06	1.03	0	1.51
TOTAL	1.97	0.86	1.03	4.66	0	8.52

NB - Figures contain estimates where no survey return was provided

FIGURE 2 – Crushed Rock Sales by End Use 2022 (million tonnes)

4.1 Sales of crushed rock for all end uses decreased in 2022. Sales of limestone, sandstone and igneous rock decreased markedly.

4.2 Total limestone sales decreased by 170,000 tonnes, total sandstone sales decreased by 520,000 tonnes, and total igneous sales decreased by 180,000 tonnes in 2022 compared to sales in 2021.

4.3 Fill/other constructional uses remains the primary use for crushed rock, utilising 56% of all sales (up 1% from 2021). Coated roadstone utilises 24% (up 1% from 2021), uncoated roadstone utilises 8% (down 2% from 2021) and concrete aggregate utilises 12% of all rock sales (no change from 2021).

Table 4
Crushed Rock Sales by Mineral Planning Authority 2020-2022 (million tonnes)

Sub-Region	Mineral Planning Authority	Crushed Rock Sales 2020		Crushed Rock Sales 2021		Crushed Rock Sales 2022	
Powys (inc Brecon Beacons)	Powys	3.07		3.21		2.68	
	Brecon Beacons NP						
South West Wales	Carmarthenshire	0.65	1.59	0.82	1.74	0.82	1.59
	Neath Port Talbot	0.33		0.29			
	Pembrokeshire	0.52		0.53		0.51	
	Pembrokeshire Coast NP					0.18	
	Ceredigion	0.09		0.10		0.08	
	Swansea	0		0		0	
South East Wales	Blaenau Gwent	0.62	3.26	0.77	3.57	1.37	3.38
	Caerphilly	0.47		0.43			
	Rhondda Cynon Taf						
	Merthyr Tydfil						
	Torfaen	0		0		0	
	Newport	0		0		0	
	Monmouthshire	0		0		0	
	Bridgend	2.17		2.37		2.01	
	Cardiff						
	Vale of Glamorgan						
TOTAL		7.92		8.52		7.65	

4.5 Table 4 sets out the crushed rock aggregate sales figures subdivided by sub-region and Local Planning Authority; however, some data has been amalgamated for confidentiality reasons.

4.6 Sales of crushed rock in Powys/BBNPA decreased by 530,000 tonnes between 2021 and 2022.

4.7 Sales in South West Wales decreased by 150,000 tonnes between 2021 and 2022 having increased by 150,000 tonnes between 2020 and 2021.

4.8 Sales in South East Wales decreased by 190,000 tonnes between 2021 and 2022 having increased by 310,000 tonnes between 2020 and 2021.

LANDBANK

4.9 A landbank is a stock of planning permissions for the winning and working of minerals. The landbank figures in Table 5 below have been calculated according to the methodology set out in the RTS2 in that the historical sales figures should reflect, not just the 10-year average (as had been used in the First Review) or the 3-year sales average as set out in MTAN1, but the highest of the 10-year and 3-year averages for each individual LPA. The permitted reserves are those estimated to be suitable for production of saleable aggregates, including low quality fill. Where operators did not provide information on aggregate sales and/or reserves, best estimates have been made from the local knowledge of Local Planning Officers and any past returns.

4.10 Caution must be exercised in using these landbank figures. The landbank calculation does not take account of geographical or operational aspects which may restrict the availability of certain types of reserves and constraints that may be placed upon working the total tonnage of planned reserves as a result of changes in planning policy, the designation of protected sites or other (non-planning) permitting requirements. In addition, the reserves in many cases have been estimated using limited sampling and testing information and the marketing conditions prevailing at the time and may be subject to revision.

4.11 Dormant sites (Sites with planning permission where working cannot re-commence until full modern conditions have been approved by the local planning authority) and sites where planning permission has been suspended (a Review of Minerals Permission has become 'stalled' and the permission ceases to authorise any minerals development until the review is completed) have not been included in the landbank calculations. Local Planning Authorities should carry out their own assessments of the likelihood of reactivation of each site but in any case, dormant reserves must be counted separately.

4.12 It is important to note that reserves earmarked as being suitable for aggregates may also be suitable for non-aggregate use. Many carboniferous limestone hard rock quarries produce significant amounts of rock suitable for both uses and these may change from year to year with market demand. Whilst many quarries may have less than 10% non-aggregates, some

may have up to 90%. Non-Aggregate reserves have not been included in the landbank calculations.

Table 5

Crushed Rock Reserves and Landbanks on 31.12.2022 by Mineral Planning Authority (million tonnes) based on 3-year average sales 2020-2022 and the 10-year average sales 2013-2022

Mineral Planning Authority	Crushed Rock Reserve 31.12.2022	3-year Average Annual Sales 2020-2022	10-year Average Annual Sales 2013-2022	Landbank (years) based on highest average
Powys	163.88	2.98	3.04	50
Brecon Beacons NP				N/A
Carmarthenshire	77.16	1.01	1.09	>50
Neath Port Talbot				>50
Pembrokeshire	14.04	0.46	0.39	31
Pembrokeshire Coast NP	6.85	0.13	0.13	N/A
Ceredigion	4.91	0.09	0.13	38
Swansea	0	0	0	0
Blaenau Gwent	104.06	1.22	1.21	7
Caerphilly				40
Rhondda Cynon Taf				30
Merthyr Tydfil				>50
Torfaen	0	0	0	0
Newport	0	0	0	0
Monmouthshire	*	*	*	>50
Bridgend	91.23	2.22	2.20	>50
Cardiff				24
Vale of Glamorgan				33
	*	*	*	

4.13 The crushed rock reserves indicated above are made up of the following percentage of rock types:

- Powys/BBNPA – 73% Sandstone, 18% Igneous and 9% Limestone
- South West Wales – 44% Limestone, 41% Sandstone and 15% Igneous
- South East Wales – 76% Limestone, 24% Sandstone

4.14 On the basis of the figures in Table 5, Blaenau Gwent and Cardiff have a landbank of less than 25 years (see 9.4 below). Where landbanks exceed 50 years these have been shown as greater than 50 years as some landbanks are arithmetically high due to significant reductions in production but could reduce very quickly if production increased. The arithmetical landbank figures, expressed in years, would therefore give a potentially misleading picture.

Table 6
Crushed Rock Reserves at Dormant/Suspended Sites by Mineral Planning Authority (million tonnes)

Region	Mineral Planning Authority	Crushed Rock Reserve 31.12.2022
Powys (inc Brecon Beacons)	Powys	0.36
	Brecon Beacons NP	
South West Wales	Carmarthenshire	11.29
	Neath Port Talbot	
	Ceredigion	0
	Pembrokeshire	0
	Pembrokeshire Coast NP	
	Swansea	0
South East Wales	Blaenau Gwent	5.21
	Caerphilly	
	Rhondda Cynon Taf	
	Merthyr Tydfil	
	Torfaen	0
	Newport	0
	Monmouthshire	0
	Bridgend	13.15
	Cardiff	
	Vale of Glamorgan	
SOUTH WALES TOTAL		30.01

4.15 Table 6 above sets out the reserves of crushed rock at dormant sites and sites where planning permission has been suspended. These reserves are not included within landbanks but can be used to offset against allocation requirements in a LDP provided an assessment of the likelihood of the future operation of the site concludes that it is likely to reactivate.

5.0 LAND WON SAND & GRAVEL

Table 7
Land won Sand & Gravel Sales by end use 2021 & 2022

	Tonnes 2021 (000)	2021 %	Tonnes 2022 (000)	2022 %
Building/soft sand for coating for asphalt/mortar	66	26	67	31
Concreting/sharp sand	29	12	22	10
Gravel – concrete aggregate, other uses	50	20	42	19
Raised material for constructional fill/unknown	105	42	89	40
Total	250	100	220	100

FIGURE 3 – Land Won Sand and Gravel by End Use 2022

Table 8**Land Won Sand & Gravel Sales by Mineral Planning Authority (thousand tonnes)**

Region	Mineral Planning Authority	Sand & Gravel Sales 2020	Sand & Gravel Sales 2021	Sand & Gravel Sales 2022
Powys (inc Brecon Beacons)	Powys	160	250	220
South West Wales	Carmarthenshire			
	Ceredigion			
	Pembrokeshire Coast NP			

5.1 Table 8 shows the Local Planning Authorities where land won sand and gravel is produced. The total sales for 2022 have decreased by 30,000 tonnes from 2021.

LANDBANK

5.2 Table 9 below sets out the land won sand and gravel landbank in the same way as the crushed rock landbank has been set out in Section 4 above. It includes both the three-year sales average and the 10-year sales average. Dormant sites have **not** been included.

Table 9**Land Won Sand & Gravel Reserves and Landbanks by Mineral Planning Authority (million tonnes) based on 3-year average sales 2020-2022 and the 10-year average sales 2013-2022**

Mineral Planning Authority	Sand & Gravel Reserve 2020	3-year Average Annual Sales 2019-2021	10-year Average Sales 2012-2021	Landbank (years) based on highest average
Powys	3.20	0.21	0.20	>50
Carmarthenshire				>50
Ceredigion				17
Pembrokeshire Coast NP				N/A

5.3 Only Ceredigion has a landbank of less than 22 years (see 9.4 below). The West Wales Sub-region together with Carmarthenshire is working collaboratively to plan strategically for adequate reserves of land won sand and gravel in the period up until 2044 rather than relying on Ceredigion in isolation. Discussions between the four Authorities have taken place and will continue with a view to producing a Statement of Sub-regional collaboration as required by RTS2.

5.4 Care must be exercised in relying on the landbank figures for Powys and Carmarthenshire as these are based on very small annual sales from relatively small sites.

6.0 MARINE DREDGED SAND & GRAVEL

6.1 Marine Dredged Sand and Gravel is landed in the Region by Cemex UK Marine Ltd, Heidelberg Materials UK Aggregates Marine Ltd, Tarmac Marine Ltd, Severn Sands Ltd and Llanelli Sand Dredging Ltd.

6.2 Marine Licences (as at December 2022) exist in Welsh waters for North Middle Ground, Culver Extension (Area 526), North Bristol Deep (Area 470/1 and 470/2) and Nobel Bank (Area 472). A site with both planning permission and a Marine Licence at Bedwyn Sands, Monmouthshire also contributes towards sales data. There are also licences in English waters of the Bristol Channel. Production from Welsh licence areas may be exported to England and vice versa.

Table 10
Port Statistics for Marine Dredged Aggregate Landings

Mineral Planning Authority	Landing Port	2020 Tonnages	2021 Tonnages	2022 Tonnages
Neath Port Talbot	Briton Ferry/Port Talbot	14,921	21,894	14,226
Carmarthenshire	Burry Port	177,686	152,471	138,261
Cardiff	Cardiff Docks	195,377	222,873	193,044
Pembrokeshire	Port of Pembroke	15,689	20,318	19,562
Newport	Newport Docks	236,480	258,202	243,633
Monmouthshire (Bedwyn Sands)	Newport	*	*	*
Swansea	Swansea Docks	35,439	20,794	24,266
Total		661,533	675,592	632,992

Source: The Crown Estate Summary of Statistics 2020, 2021 and 2022

* The aggregate removed from the Bedwyn Sands in Monmouthshire is partly above low water mark and that area is therefore under the jurisdiction of the Local Planning Authority. The material is landed in Newport by a single Company. The landing data for that Company is therefore confidential.

6.3 Landings of marine sand and gravel have decreased between 2021 and 2022 except at Swansea where they have shown a slight increase.

Table 11
Marine Sand & Gravel Sales by end use 2021 & 2022 (000 tonnes)

	Tonnes 2021	Tonnes %	Tonnes 2022	Tonnes %
Sand – Asphalt	179	28	167	27
Sand – Mortar	333	52	333	54
Sand – Concreting	107	17	103	17
Gravel (suitable for concrete aggregates)	0	0	0	0
Sand & Gravel (suitable for construction fill)	18	3	15	2
Total	637	100	618	100

FIGURE 4 – Marine Sand and Gravel Sales by End Use 2022

6.4 Marine Sand and Gravel Sales in 2022 have exceeded the amount of material dredged from Crown Estate licence areas. Part of the reason for this difference is that sales figures include material dredged from the Bedwyn Sands which is not within The Crown Estate. In addition, there would be sales from stocks being held at the wharfs and differences in timing

between sales and landings. Conversion factors from cubic metres to tonnes may also be playing a part.

6.5 Sales of marine sand and gravel have decreased from 637,000 tonnes in 2021 to 618,000 in 2022, a decrease of 19,000 tonnes on top of a decrease of 95,000 tonnes in 2021 and a decrease of 76,000 tonnes in 2020. Sales of sand for concrete have declined from 107,000 tonnes to 103,000 tonnes. Sales of sand for asphalt has also declined from 179,000 tonnes to 167,000 tonnes. Sales of sand and gravel for construction fill have declined from 18,000 to 15,000. Sales of sand for mortar have remained steady.

7. SECONDARY AGGREGATES

7.1 Secondary Aggregates are usually defined as

- aggregates obtained as a by-product of other quarrying and mining operations, such as china clay waste, slate waste and colliery spoil, or
- aggregates obtained as a by-product of other industrial processes, such as blast furnace slag, coal-fired power station ash, incinerator ash and spent foundry sand.

A list of Secondary Aggregate sites within the SWRAWP Region is set out in Appendix C

7.2 The Survey response in relation to Secondary Aggregate Sales in 2022 was negligible.

8. RECYCLED AGGREGATES

8.1 Recycled Aggregates are defined as aggregates obtained from the demolition or construction of buildings or structures or from civil engineering works, including asphalt road planings and railway ballast. A list of known aggregate recycling facilities in the SWRAWP Region is set out in Appendix D.

8.2 Even though recycled materials play an important role as a substitute for primary aggregates it is difficult to obtain accurate figures of the volumes produced. Natural Resources Wales has undertaken a National Construction & Demolition waste survey for 2019 [Natural Resources Wales / Construction and demolition waste survey for 2019](#)

9. RTS 2nd REVIEW

9.1 The Regional Technical Statement (RTS) is a requirement of Minerals Technical Advice Note 1: Aggregates (MTAN1) which was issued by the Welsh Government in March 2004.

9.2 MTAN1 sets an overarching objective which seeks to ensure a sustainably managed supply of aggregates (which are essential for construction), striking the best balance between environmental, economic and social considerations. The RTS provides a strategic basis for aggregate provision within LDPs in the region.

9.3 The first Regional Technical Statement for the area covered by the South Wales Regional Aggregates Working Party was published in October 2008. The RTS 1st Review was published in August 2014 and the RTS 2nd Review was published in September 2020.

9.4 The RTS2 recommends that provision be made for aggregate supply from each Local Planning Authority area is essentially based on an annualised apportionment figure, being the higher of the 3-year sales average and the 10-year average of sales, refined as necessary taking account of annualised housing completion figures and other factors of sustainability. The required provision is calculated by applying the annualised apportionment over 25 years for crushed rock (LDP period plus 10 years) and 22 years for sand and gravel (LDP period plus 7 years).

9.5 The annualised apportionments for crushed rock contained within Table 5.3 of the RTS2 (as corrected by the Policy Clarification Letter dated 11 November 2021)¹ are provided in Table 12 below together with the sales figure for 2022. The purpose of this comparison is to assess whether there is a danger of under-provision within any Local Authority area. Sales exceeding the annualised apportionment figure is merely an early warning that aggregate reserves are being used more quickly than anticipated in the RTS2 and there may be a danger of under-provision within the Local Development Plan period. Further detailed assessment would be required in each case.

Table 12**Crushed Rock Sales in 2022 by Mineral Planning Authority (million tonnes) in comparison to the RTS2 annualised apportionment**

Region	Mineral Planning Authority	Crushed Rock Sales 2022	RTS2 Annualised Apportionment
Powys (inc Brecon Beacons)	Powys	2.68	3.519
	Brecon Beacons NP		0.368
South West Wales	Carmarthenshire	0.82	1.102
	Neath Port Talbot		0.305
	Pembrokeshire	0.51	0.677
	Pembrokeshire Coast NP	0.18	0.259
	Ceredigion	0.08	0.272
	Swansea	0	0.305
South East Wales	Blaenau Gwent	1.37	0.204
	Caerphilly		0.546
	Rhondda Cynon Taf		0.765
	Merthyr Tydfil		0.204
	Torfaen	0	0.150
	Newport	0	0.452
	Monmouthshire	0	0.242
	Bridgend	2.01	0.711
	Cardiff		1.411
	Vale of Glamorgan		0.682
SOUTH WALES TOTAL		7.65	12.174

9.6 Sales in 2022 for Blaenau Gwent, Caerphilly and Vale of Glamorgan exceeded the annualised apportionment figure. In the South Wales context as a whole, sales were approximately 63% of the total annualised apportionment calculated for the region.

9.7 RTS2 recommends a minimum tonnage allocation (to be met within a Local Development Plan through the identification of areas of land for future mineral working) for each of the

following Local Planning Authority areas – Ceredigion (1.428 million tonnes), Pembrokeshire (212,000 tonnes), Swansea (7.636 million tonnes), RCT (9.295 million tonnes), Cardiff (7.475 million tonnes), Newport (11.3 million tonnes), Torfaen (3.75 million tonnes) and Blaenau Gwent (3.78 million tonnes). To date only RCT has met its allocation with the granting of planning permission for an extension of Craig yr hesg Quarry although Blaenau Gwent does have allocations in its LDP.

9.8 The annualised apportionments for sand and gravel contained within the RTS2 are provided in Table 13 together with the sales figure for 2022.

Table 13 Sand and Gravel Sales in 2022 by Mineral Planning Authority (million tonnes) in comparison to the RTS annualised apportionment			
Region	Mineral Planning Authority	Sand & Gravel Sales 2022	RTS Annualised Apportionment
South West Wales	Carmarthenshire	0.22	0.003
	Pembrokeshire		0
	Pembrokeshire Coast NP		0.118
	Ceredigion		0.188
SOUTH WALES TOTAL		0.22	0.309

9.9 In the South Wales context as a whole, sales were approximately 71% of the total annualised apportionment required within the region.

9.10 RTS2 recommended minimum allocations necessary in – Ceredigion (3.626 million tonnes). There are allocations within the current Local Development Plan, but these will not meet the entire allocation requirement.

9.11 The RTS2 notes that the apportionment recommendations do not take fully into account all factors that may be material to the ensuring of an adequate supply of aggregates obtained from appropriately located sources. Such factors include:-

- The technical capability of one type of material to interchange for another.
- The relative environmental cost of substitution of one type of material by another.
- The relative environmental effects of changing patterns of supply.
- Whether adequate production capacity can be maintained to meet the required supply.

9.12 The RTS2 also states [Annex A] that in exceptional circumstances where it is justified by new (e.g. more up to date, more detailed or more precise) evidence, it is open for individual Local Planning Authorities to depart from the annualised apportionment and allocation figures recommended in the RTS when preparing their LDP policies. In doing so however, a Local Planning Authority would need to demonstrate that through collaboration with other LPAs and consultation with relevant stakeholders their intended departure would not undermine the overall strategy provided by the RTS itself

10. MAJOR INFRASTRUCTURE PROJECTS

Major infrastructure projects are an important consideration in the assessment of the future demand for aggregates. The following is a list of projects which may have an impact on future demand if they go ahead

A465 Heads of the Valleys Road dualling

Cardiff Eastern Bay Link Road

Cardiff Capital Region Metro Project

A4226 Five Mile Lane Improvements (Weycock Cross, Barry to Sycamore Cross)

Northern Access Road (St Athan Enterprise Road) - Under Construction

M4 Junction 34 link to A48 - WelTag Study on-going

Cardiff Airport and St Athan Enterprise Zone

Land at Upper Cosmeston Farm, Lavernock - 576 units

Land West of Swanbridge Road, Sully - 500 units

Swansea City Centre and Fabian Way Redevelopment

Student Accommodation and Office Developments in Cardiff

Major Housing Developments (approx. 14,000 houses) in Cardiff

A40 Llanddewi Velfrey to Redstone Cross Road Improvements

Flood defence works on Pengam Foreshore, Cardiff

Global Centre for Rail Excellence, Onllwyn (Powys / Neath Port Talbot)

Coed Darcy (approx. 2,000 houses + commercial development), Llandarcy

Major Housing Developments (approx. 8,628 new dwellings) in Bridgend

Swansea Blue Eden Project

FLOW Windfarms

Port upgrades Milford Haven & Port Talbot

Anglesey Nuclear

11. MONITORING OF PLANNING APPLICATIONS

APPENDIX A

MEMBERS OF THE SOUTH WALES AGGREGATES WORKING PARTY

(at date of publication)

Rhodri Griffiths (Chair)
Head of Place & Sustainability
Carmarthenshire County Council

Thomas R Boothroyd (Secretary)
Senior Minerals & Waste Planning Officer
Carmarthenshire County Council

Ffion Williams (Asst. Secretary)
Development Management Officer (Minerals & Waste)
Carmarthenshire County Council

Steve Smith
Development Services Manager
Blaenau Gwent County Borough Council
(Represented by Steph Hopkins)

Catherine Mealing-Jones
Chief Executive
Brecon Beacons National Park
(Represented by Davina Powell)

Jonathan Parsons
Head of Planning
Bridgend County Borough Council
(Represented by Richard Matthams)

Ryan Thomas
Planning Services Manager
Caerphilly County Borough Council
(Represented by Ian Mullis)

Simon Gilbert
Head of Planning
City of Cardiff Council
(Represented by Stuart Williams)

Russell Hughes-Pickering
Corporate Lead Officer Economy and Regeneration
Ceredigion County Council
(Represented by Sarah Groves-Phillips)

Judith Jones
Director of Neighbourhood Services
Merthyr Tydfil County Borough Council
(Represented by Craig Watkins)

Craig O'Connor

Head of Placemaking
 Monmouthshire County Council
 (Represented by Susan Hall)

Ceri Morris

Head of Planning and Public Protection
 Neath Port Talbot County Borough Council
 (Represented by Anjuli Davies)

Tracey Brooks

Head of Regeneration & Economic Development
 Newport City Council
 (Represented by John Gibson)

Harriet Lavender

Acting Head of Planning
 Pembrokeshire County Council
 (Represented by Bob Smith)

Sara Morris

Director of Park Direction & Planning
 Pembrokeshire Coast National Park
 (Represented by Gayle Lister)

Gwilym Davies

Head of Public Protection, Planning and Property
 Powys County Council
 (Represented by Peter Morris)

Simon Gale

Director of Prosperity and Development
 Rhondda-Cynon-Taf County Borough Council
 (Represented by Owen Jones)

Phil Holmes

Head of Planning and City Regeneration
 City & County of Swansea
 (Represented by Ruth Henderson)

Rachel Jowitt

Strategic Director, Economy & Environment
 Torfaen County Borough Council
 (Represented by Adrian Wilcock)
